PURPOSE/ACTION REQUESTED

Council is to provide direction on next steps for possible noise analysis to be done at the Bituminous Roadways asphalt plant and sand and gravel operation.

BACKGROUND

On October 9, 2017, Council approved a five year extension to the Sand & Gravel Overlay District for the Bituminous Roadways operation. At that meeting, several residents spoke about the noise from the operation that is becoming a disturbance to them. They asked Council if some type of noise study could be done to determine if any maximum noise levels are being exceeded at the operation. Council asked staff to research what has been done for any other businesses in the area and to find out how much a study would cost.

ANALYSIS

Staff found four other instances where noise was reviewed as part of an application or after an operation began.

1. Bituminous Roadways 2011 Expansion EAW. As part of the EAW review, an analysis was done by reviewing topography, distance to homes and noise generated (dB levels of equipment) based on standardized studies. Using formulas, noise determinations were made. Actual noise was not measured off-site or on-site. The EAW analysis determined the operations would not exceed noise limits.

2, 3. Pine bend landfill expansions – 2003 and 2016. The same type of analysis was done during the EAW process for both applications. No on-site or off-site noise study was completed, only an analysis based on standardized studies and known equipment maximum decibel levels. Both EAW's concluded noise limits would not be exceeded.

4. Simon's Delivers – 2005 noise concerns. In 2005, neighbors west of the Simon Delivers facility on Carmen Avenue addressed the City Council with concerns about noise generated by the facility during early morning hours. Council authorized Barr Engineering to conduct a noise study. Barr conducted monitoring from the back yard of one of the westerly neighbors. Monitoring of the primary noise sources (trucks and forklifts) indicated the facility was within state noise standards. It was also noted that background noise (trains, aircraft and traffic) was part of the overall noise recorded each day.

Staff has contacted Barr Engineering to find out what type of noise monitoring studies are available and roughly how much they would cost. A typical noise monitoring method would be to do a continuous 24 hour monitoring on the Bituminous Roadways property to sample sound when the operation is running and not running. This can determine if the overall continuous noise is under or exceeds MPCA standards. Short, loud bang noises coming from such things as dump truck tailgates or beds would not

February 5, 2018
Council Memo – Neighborhood Noise Analysis/Bituminous Roadways
Page 2

be a noise violation. The MPCA standards are for long period continuous sounds and not short quick loud sounds. A typical noise monitoring analysis would cost around \$5,000.

ACTIONS

Staff requests further direction from Council if a noise study should be pursued.

CITY OF INVER GROVE HEIGHTS

REQUEST FOR COUNCIL ACTION

Meeting Date: February 1, 2018
Item Type: Work Session
Contact: Paul Schnell 651.450.2526
Prepared by: Paul Schnell, Police Chief

PURPOSE/ACTION REQUESTED

Members of the police department will provide a summary, overview, and analysis of data from the First Annual Community Safety Survey.

SUMMARY

On December 14, 2017, the police department launched the First Annual Community Safety Survey - an online survey intended to collect information and allow analysis of community feedback about crime, traffic, and quality-of-life issues. The 39-question survey closed on January 12, 2018, after receiving over 450 responses.

The survey addressed a wide array of crime, quality of life, and other questions to assess perceptions of community safety.

Following closure of the online survey, department leadership identified two patrol officers, two sergeants, and an investigator to work with command staff to analyze the survey data and develop a set of policing priorities for 2018. The policing priorities are informed by survey data and other departmental data points.

During the work session, a cross-section of the analysis team will present survey findings, feedback, and the resulting policing priorities going forward.

Attached to this report is a quantitative overview of the survey data, along with “word cloud” charts for questions 7 and 25, which both generated a considerable number of narrative responses. The “word cloud” visually depicts how frequently certain words appeared in narrative responses.

Hard copies of the PowerPoint presentation will be made available to Councilmembers at the work session.

CUSTOMER SERVICE POLICY

3rd Draft

01/22/18

DISCLAIMER: Any department or service within the City that must comply with a Federal or State statute for purposes of compliance, privacy or confidentiality are exempt from the Response Time section of this policy.

MISSION

The City of Inver Grove Heights' mission is to provide services and facilities that enhance the quality of life in our vibrant community.

PURPOSE

The purpose of this policy is to assist our leaders and staff in providing reliable, responsive and exceptional service to its customers. We define our customers as people who live, work and play in the city, as well as everyone the city does business with, including internal staff and/or employees.

SERVICE STANDARD

The City's service standards are as follows:

- Treat the customer with respect and in a friendly, polite demeanor.
- Provide prompt, accurate and efficient service.
- Maintain the customer's privacy as outlined by Minnesota Government Data Practices.
- Keep the customer informed; including, but not limited to deadline extensions, delays and status reports.
- Determine how the customer would like to stay informed and provide timely feedback.

RESPONSE TIMES

The City's goal is to answer questions, inquiries and respond to service requests or resolve complaints **within the timeframes specified below**:

- At least 24 hours to return phone calls, emails or website inquiries.
- At least 36 hours to respond to service calls for maintenance/repair or requests for documentation (such as Council meeting minutes).
- At least 48 hours to respond to a formal complaint **on site or physically**

Responses will be addressed during regular business days and hours of operation, Monday – Friday, 8:00 AM – 4:30 PM, or when reasonably applicable. Facilities and/or departments that operate beyond the regular business hours, including weekends, may respond to inquiries and requests during those ~~standard~~ hours of operation (i.e., police department, community center, golf course, etc).

If an inquiry is received on a Friday, customers can expect a response ~~on the next business day~~ **the following Monday**. If an inquiry is received on a Friday, but the next business day is a holiday, customers can expect a response the next business day **following the Holiday**(~~the following Tuesday~~).

If an inquiry is received and a staff member is out for any extended period of time, customers will receive a response from another qualified staff member or be directed to an additional resource for assistance. (Note: If the City experiences any unexpected emergencies, MN State Statute allows up to 10 days for a response).

OUT OF SCOPE

This policy may not regulate all customer service standards for departments required to respond to emergencies, such as police and/or fire. These departments maintain their own set of internal and/or external standards of conduct and complaint resolution following Federal and/or MN State Statute(s).

COMPLAINT RESOLUTION PROCESS

Each department within the City will be required to address its own unique set of inquiries or complaints based on the services they provide and follow these best practice guidelines for complaint resolution:

- It is the responsibility of the City to attempt to resolve concerns by dealing with customer(s) directly involved with the issue where appropriate. **The City will** ~~in addition to attempting to resolve issues or concerns before they become complaints and identify opportunities to improve city service(s).~~
- A customer's service call will be considered **the highest** priority if it concerns a report of a city-owned or operated infrastructure problem (such as potholes, a tree in the right-of-way from storm damage or vandalism at a city park).
- Reports or service calls will be given to the department contact, who will then give the directive when the problem will be resolved. The customer will be contacted and informed when they can expect a resolution or if the issue has been resolved.
- Once the problem is identified and resolved or fixed, the department contact will notify the customer who filed the report or complaint acknowledging that a resolution is in place.
- The City will ~~not allow the burden to fall on the customer to re-report an issue if the City fails to communicate~~ **with the complainant or customer** regarding a ~~the~~ resolution of a problem.

- If the customer's inquiry or complaint is complex in nature and requires further discussion, they will be encouraged to schedule a private appointment with the department contact during regular business hours.

Here is the list of department contacts for the complaint resolution process:

DEPARTMENT	NAME	CONTACT INFORMATION
Administration	Carrie Isaacson Administrative Services Coordinator	Phone: (651) 450-2510 Email: cisaacson@invergroveheights.org
Finance	Kristi Smith Finance Director	Phone: (651) 450-2521 Email: ksmith@invergroveheights.org

MEDIA INQUIRIES

Media affiliates may contact the City for inquiries including, but not limited to, programs and/or services the city offers, or information on cases that may be sensitive or privacy-protected in nature. Staff should forward these types of requests to the City Administrator for a response. These types of inquiries will follow Minnesota Government Data Practices. *Please refer to the disclaimer on the front page regarding Federal or State statute compliance.*

TRAINING

Newly-hired and re-hired employees will be required to complete Customer Service training within the first thirty (30) days of employment. Hiring managers will ensure the completion of the training within the required timeframe. A knowledge-based assessment test and/or written documentation of completion of training ~~must~~ **will** be submitted to Human Resources.

All other staff will be required to complete **a** Customer Service training **course** within a twelve (12) month period of their hire (anniversary) date. Employees who perform annual reviews will ensure the completion of the training within the required timeframe. A knowledge-based assessment test and/or written documentation of completion of training must be submitted to Human Resources **for documentation in the personnel file.**

Course content will be dependent on the employee's position level, position classification and position status (full-time, part-time, seasonal or temporary). Employees may choose an in-person training or online course(s), depending on availability, but are not required to complete both.

Course content will be offered by Human Resources during the hiring/on-boarding process. However, if other training is available through other entities, (example: courses conducted by a Federal, State or County training resource), the hiring manager may utilize that alternative option, so long as the content is relevant to Customer Service and proof of completion is submitted to Human Resources.

ACCESSIBILITY

The City will make our services accessible to all customers:
